

## **PREFORM TERMINOLOGY**

### **RETROREFLECTIVITY**

Means- Light source bounces back to the eye of the person viewing it.

### **RELATIVE LIFE COST**

Example:      The cost of paint      Say \$25.00 per m<sup>2</sup>  
                    The cost of Preform      Say \$40.00 per m<sup>2</sup>

Over a five (5) year period the painted surface will have to be re applied approximately four (4) to six (6) times, therefore the real cost of paint over that period is now **5 x \$25.00 = \$125.00.**

**The perform will last approximately 6 years plus at a cost of \$40.00.**

Therefore the paint in real terms is three (3) times the cost of Preform

### **THERMOPLASTIC STRUCTURE**

Hydro Carbon (AWIS Preform) – this product does not require the road surface to be pre-heated prior to installation.

### **STANDARDS**

AWIS Preform and its ingredients used in its manufacture complies with:

- AS 4049.2
- R141 RTA – 3357
- R141 RTA – 3353

### **ADDITIONAL SAVINGS**

- **LARGE SAVINGS IN REDUCION OF LABOUR TIME TO INSTAL**
- **LARGE SAVINGS IN REDUCION OF ROAD TRAFFIC CONTROL COSTS.**
- **PURCHASING DIRECTLY FROM THE MANUFACTURERS**
- **REDUCING POTENTIAL LIABILITIES FROM INSURANCE CLAIMS IF PEOPLE CLAIM TO HAVE SLIPPED ON PAINTED SURFACES.**
