

# DEWATERING FILTER BAGS & PIPE SOCKS

The AWIS Dewatering sock is one of the easiest ways to filter run off water from your construction site.

They are designed to connect directly to the end of your discharge hoses.

These socks contain the sediment and debris as the water is being discharged from your property.

This helps to keep the runoff clean, preventing pollution of the storm water drains.

AWIS Pipe socks are available in:

The following sizes:

**150mm x 750mm**

**250mm x 750mm**

**250mm x 1500mm**

**450mm x 1500mm**

**250mm x 20.0m**

## **Dewatering Filter Bags.**

**AWIS Dewatering Bags** also known as silt bags or silt filter bags.

They are made from durable 8oz Non-Woven geotextile filter fabric. that is excellent for removing the silt sediment and debris from your run off water.

Constructed from strong durable material these bags feature an inlet tube that can accommodate a 100mm discharge hose.

This combination of strength durability and filtration makes them ideal for dredging, dewatering construction sites and lagoon maintenance as well as controlling site run off.

The **Dewatering Filter bags** are available in three Standard Sizes 1800mm x 1800mm, 2400mm x 3000mm and 3000mm x 6000mm

**Specials can be made on request.**
